

# Adult Services Technology Enabled Care (TEC) Vision

1.

For TEC to be an enabler for people to have;

- **a home**, where they feel safer because of TEC;
- **a friend**, or a community, who they can connect with using TEC;
- **and a purpose**, that is enabled by TEC.

2.

For all practitioners in Adult Services, our Community and Voluntary sector and our care providers to **trust** Technology Enabled Care (TEC), **understand** the options available, **always consider TEC** as part of our support offering and have **easy access** to prescribe it.

3.

For all practitioners in Adult Services, our Community and Voluntary sector and our care providers to have access to a **supermarket of TEC choices**. A place where we can take our virtual shopping basket to pick from the shelf what is most suitable and beneficial for the **individual person** we are supporting.

4.

For our supermarket of TEC choices to be **trusted** by and enable **digital inclusion** for the people we support.

5.

For our supermarket of TEC to be stocked with options that **prevent, reduce or delay the need for people to have formal support** by doing one or more of the following;

- Improving a person's choice, control and independence.
- Enhancing a person's quality of life.
- Reducing a person's health inequalities.
- Building a person's resilience.
- Strengthening the use of informal support.
